

# Laboratory Earth:

## Earth's Changing Systems

## Come Join the Fun!

**Description:** From the universe to the earth and everything in between! Learn how to read the record of change in rocks, look for evidence of change in the Earth's cycles, and explore current issues in environmental change.

**Scholarships:** 100% tuition scholarships will be awarded to the first 15 students to register. There is an enrollment limit of 20, so act fast! For more information contact Cindy Larson-Miller at 402-730-9691 or [clarson@unlserve.unl.edu](mailto:clarson@unlserve.unl.edu).  
**NOTE:** Student fees (technology, library, and distance education fees, \$123.05) are NOT PAID FOR BY SCHOLARSHIP. These fees are the responsibility of the student.

**Registration:** You may apply to the University of Nebraska-Lincoln at [www.unl.edu/gradstudies/](http://www.unl.edu/gradstudies/). If you are already enrolled, go to your WAM! page on the UNL website. The course is 3 credits. If you have questions please contact Cindy Larson-Miller at 402-730-9691 or [clarson@unlserve.unl.edu](mailto:clarson@unlserve.unl.edu).

### What Do Former Lab Earth Students Have to Say?

- "The strong point is that this class offers content that I could integrate into my class. It is essentially an example of a curriculum I could use if I was doing either face-to-face or online."
- "I am very impressed with how the course is organized. I find the content challenging but not too difficult. Everything is presented in an interesting manner. The experiences in using the technology are definitely useful."
- "The information I got out of this class was outstanding. It is already making a difference with how I teach and what I have to offer my students. This class has afforded me the opportunities to try new things with technology as well."
- "I am enjoying the online conversations and discussion very much. It makes me feel connected to other science teachers and that I have people to help when I am stuck with something!"
